DETAILS ON THE BACK ►

MIR-ATIC AUTOMATIC RIVET MACHINE

Our MIR-ATIC feeds the rivet tool automatically each time you press the trigger.

No more time wasted handling the rivets and loading the tool! You will save time and money on each rivet. The design lets you use the tool with just 1 hand.

Your production time will be dramatically reduced, as the tool can install 40-45 rivets/minute.

Also, our machine can let you use different models of rivets of the same diameter.

Just do it faster and better!
